

Designer Walls 2

By
NOON

Joke Martin is an independant Flemish craftswoman and designer of luxurious wallpapers.

Her monumental dessins, often featuring large eyecatching elements of Nature, are appreciated in homes, as well as public spaces, entrance halls, meeting rooms, and in business and industrial environments all over the world.

Joke's latest wallpaper collection is very much based on the look and feel of natural textures like wood, stone, sisal and silk.

In order to achieve that typical tactile sensation she transforms her original drawings and paintings into sculptural bas reliefs through the use of traditional craft techniques like embroidery, claying, weaving, marquetry,..

Wallpapers designed by Joke Martin have very much a kind of spatial 3D appearance, creating grand and surprising visual impressions thanks to the use of unusual materials. Her consistent focus on manual crafts, combined with digital techniques, results in rich colours and warm natural dessins. The uni colours that match with the dessins of the collection are also mostly wood or stone textures.

Through her own label By.Noon, Joke has also been creating textiles for home wear and furniture accessories. Many of which have found enthusiasts in Europe, the Middle East and Asia.
